

Electrifying Mining - with ITEZZE

Registration for Mine Site Operators

Registration

Mine site operators need to register to work with ITEZZE by completing and returning this form and making the relevant payment in accordance with the instructions below. Registration does not involve any further commitment for mine site operators beyond the required payment (which offsets the cost of processing their application and designing a system for their mine). ITEZZE works with mine operators on a 1st come 1st served basis but may nevertheless at its discretion vary the order where it considers a particular mine site may represent a reference site with accelerated roll-out potential.

Background

For information on the revolutionary ITEZZE system, and value offered, please refer to the ITEZZE Website; ITEZZE Miners Report and the ITEZZE expression of interest dated 31 July 2021 in response to the 'Charge On Innovation Challenge'.

Mine site Information

ITEZZE needs certain preliminary information at the outset. Any mine site operator wishing to register is therefore asked to provide the details overleaf. A separate registration application should be made for each mine site. To receive a Mine Registration Nos (MRA) please ring +61 1300 483933; or Email mineoperation@itezze.com.au cc. corporate@itezze.com.au

Next Steps

Following registration ITEZZE will start the mine setup process; put the site in the setup queue and arrange for a mine site inspection by licensed engineering consultants as a basis for planning, design, procurement and implementation.

Contact details

Please complete opposite and over-leaf and return as indicated below

name

e-mail address

mobile number

Please return by post to Locked bag 1000, Mansfield DC, Queensland 4122, Australia and advise its despatch to ITEZZE Registration at Ph: +61 1300 483 993

Please complete the details below – all sums in USD		Number	Unit Cost	Total Cost US\$
Details of Mine Site				
Name of mine site	MRA			
		1	\$1,000,000	1,000,000
Location of mine site – country & region				
Details of Vehicle Fleet needing Retro-fit Operating on Mine Site				
Haul trucks - Diesel electric	Note <i>Licensing will relate (and be limited) to the number of vehicles specified in each category. Other vehicles for use on-site may be licensed separately at a later date. Licensing and supply will be conducted through a separate mine services company but is arranged by IT&ES Industries (Oz) Pty Ltd which is responsible for registration. Please Note: Registration Fees are non-refundable.</i>		\$15,000	
Haul Truck - Fully Diesel			\$30,000	
Excavators			\$100,000	
Bulldozers			\$50,000	
Utility & 4WD vehicles			\$25,500	
Buses & vans			\$30,000	
Total – subject to 10% GST				

Hire model & power supply			
The ITEZZE mine system lets mines hire their batteries. It also lets them use re-charging infrastructure owned by third parties for around from 7.1 US cents per kWh used and also to arrange for the supply of electricity (solar, LNG or other) from third-party off-grid suppliers.	Please indicate (by ticking the appropriate box or boxes opposite) if you are interested in taking advantage of any of these options. Doing so does not put you under any obligation.	Batteries	<input type="checkbox"/>
		Charging infrastructure	<input type="checkbox"/>
		Electricity from third-party suppliers	<input type="checkbox"/>

Payment

Please send your remittance (in USD) for the total shown above (plus 10% GST)* by EFT to the account specified in the panel opposite with your company name (as registered) and MRA number as the reference. The account holder is authorised licensee IT&ES Industries (Oz) Pty Ltd ABN 93 628 532 212 which will send a receipted GST invoice promptly on receipt of this form (duly completed) at the locked bag address overleaf. Payment and return of this form will complete the registration application subject only to payment of mine site and inspection costs. These will be invoiced separately at a later date on behalf of the site inspection company and are payable within 14 days from date of invoice. They are estimated to range from USD115,000 to USD130,000 (plus travel and GST as applicable) depending on mine site location.

*Registration Fees are used to offset the expense associated with designing a system for each mine site and processing site applications
