

GOVERNMENT ELECTRIC VEHICLE REGISTRATION

IT & ES Industries (Oz) Pty Ltd ACN 628 532 212

ITEZZE is rolling out a swap battery technology worldwide for electric vehicles (EVs). Information on why governments need to move the nation from oil fuels to ITEZZE can be found in **Foundational Shift in the way Economies Operate** (itezze.com/technical). Without oil, GDP of some nations could drop 100% within 10 years. ITEZZE can prevent this. Governments need to register their nation to move it across to ITEZZE. People can register to buy ITEZZE vehicles, but to reach critical mass it is better for governments to mass register private vehicles. This sends a clear message to carmakers, ITEZZE infrastructure providers and energy suppliers that government supports the ITEZZE rollout and wants it operating in their nation.

GOVERNMENT Q-SPOTS – Vehicles for Govt Use (Please Read Instruction Sheet)

GOVERNMENT FLEET SIZE: LITRES OF FUEL USED/MONTH:

Governments can buy Q-Spots for the vehicles they wish to purchase. Prices are listed below. Govts need to nominate type/numbers of vehicles required. They can be sold on to government departments or State and Local Government Authorities. Q-Spots can be purchased to buy new and/or to have second-hand equipment Retro-Fitted to operate on ITEZZE Systems. Govt Depot requirements need to be Registered, so if a Govt has 30 depots they need set-up to charge batteries in vehicles they need to pay \$US\$10,000/depot in Rego Fees. Depot setup will require a Scoping/Design Plan by an ITEZZE Registered Engineers. The Scoping Fee is \$17,000 per depot and billed when the engineers are available to commence the work.
